```
A program which displays (n) lines of the following pattern.
               1
              21
             321
             . . . .
            n...1
     Example :
       (n = 3)
               1
              21
             321
import java.util.Scanner;
class Staircase {
     public static void main (String[] args) {
           System.out.print("Enter a number : ");
           int number = (new Scanner(System.in)).nextInt();
           for (int i = 1; i <= number; i++) {</pre>
                 for (int j = number - i; j >= 0; j--)
                       System.out.print(" ");
                 for (int j = i; j > 0; j--)
                       System.out.print(j);
                 System.out.print("\n");
           }
     }
}
     Variable Description :
     ______
     Serial no. | Variable name | Data type | Purpose
     | int | Stores ---
            l number
                                             | Stores the number
             - 1
       2 | i | int | Counter variable (line | number)
       3 | j | int
                                       | Counter variable
```
